

DSA Lab – Basic Array Programs (Python Version)

Program 1: Input and Display 5 Array Elements

```
arr = []

print("Enter 5 numbers:")

for i in range(5):
    arr.append(int(input()))

print("Array elements are:")

for i in range(5):
    print(arr[i], end=" ")
```

Program 2: Calculate the Sum of Array Elements

```
arr = []
sum_val = 0

print("Enter 5 numbers:")

for i in range(5):
    arr.append(int(input()))

for i in range(5):
    sum_val = sum_val + arr[i]

print("Sum =", sum_val)
```

Program 3: Display the First Element

```
arr = []

print("Enter 5 numbers:")

for i in range(5):
    arr.append(int(input()))

print("First element =", arr[0])
```

Program 4: Display the Last Element

```
arr = []

print("Enter 5 numbers:")

for i in range(5):
    arr.append(int(input()))

print("Last element =", arr[4])
```

Program 5: Display Array in Reverse Order

```
arr = []

print("Enter 5 numbers:")

for i in range(5):
    arr.append(int(input()))

print("Reverse order:")
```

```
for i in range(4, -1, -1):  
    print(arr[i], end=" ")
```
